 FACE

**Euromakeup** is a company founded in 2016 and is part of Eurovetrocap group, created with the aim of producing and selling primary packaging dedicated to the world of make-up.

Born with the will to replicate the business model of Eurovetrocap, which is based on a wide range, flexible MOQ, reduced time to market, efficient customer care, and competitive prices.

**Euromakeup** aims to support companies in the make-up sector, starting with Italian firms, whose excellence is recognized around the world starting from the contract fillers to continue with the big and small brands established at European level and worldwide. Our goal is to become a reliable partner with whom to develop successful projects.

### **EUROMAKEUP PLUS**

Euromakeup aims to be a development partner for all its customers. To achieve this, Euromakeup offers very low MOQs also for decorated products.

Thanks to the capacity to store the semi-finished components, Euromakeup is able to break down the time-on-market, meeting the needs of customers on an ever dynamic and proactive market. It offers a wide range of customizations, from silk screen to hot stamping, painting and metallization.

It is constantly looking for alternative and innovative solutions to satisfy creativity and brand awareness on the market.

## WAREHOUSE

We have more than 22.000 pallet spaces between the warehouse in Milan and Florence, managed by a latest generation software able to process thousands of orders per year minimizing the lead times. Logistic technology is one of our strengths globally recognized.

## CONTROL OF THE SUPPLY CHAIN-PRODUCTION

The privileged position of the company within an industrial district full of specialized excellences in more specific processes, allows us to closely monitor the entire production process, from the development of our molds to the decoration of the item.

## R&D AND DESIGN

With our team of designers and technicians we are able to develop innovative projects starting from a research on the latest trends, or from your idea. We use cutting-edge software for 3D modeling and rendering, as well as CNC machines and 3D printers for prototyping.

## QUALITY

At our disposal we have the support of Eurovetrocap following us in all phases of the process, from the selection of the raw materials to execute the order. Thousands of checks per year are made in our laboratory with appropriate tools, to carry out vacuum leakage tests, tightening and separation force on caps, coupling, and aging tests in request to ensure compatibility with your product.
